

FAQ- SHOPPING

How do I place an order?

As Easy as 1-2-3!

- 1) Browse through the products available in the category you selected. You will see the available items listed, with picture, brand name, brief description, and price. Just click on the image/title to select the item. Select the color, quantity desired, and logo choice/placement (if available) and **Add to Cart**. On the **Shopping Cart** page you can make changes to your order as needed.
 - 2) When ready to place your order, enter the information on the Checkout page and complete your billing/payment information.
 - 3) Upon submitting the order, you will receive an email order confirmation.
- * If your store is integrated with one of your internal systems, you may also receive notifications in that system.

Once I've placed an order, can I cancel it?

Our turnaround times are short, so please call Customer Service (800-648-8588) and provide your order number to learn the status of your order and whether you can cancel it, or if it has been already shipped.

How do I return products?

Within 30 days of receipt, please contact our Customer Service representative and advise on your issue and what type of item you would like to return. Since our items are customized, we consider the decoration, item type, quantity and reason for return. Thus we would like to communicate with our clients before the return authorization is provided. When Customer Service initiates the return process, they will provide instructions along with where to ship your return.

FREQUENTLY ASKED QUESTIONS

What payment methods are available?

All prices on this site are in U.S. dollars. Your store features customized payments that have been approved by your internal program manager. If you are paying by credit card (Visa, MasterCard, Discover or American Express), the name and billing address you enter at Checkout must match your credit card billing address so we may process your order.

Is it safe to pay with my credit card?

Yes. We value our relationship with you as a continuing customer, and we take security very seriously. Concord Marketing Solutions uses the latest technology offered providing the safest way to shop using a credit card. Unlike making a purchase in a physical store, with sales clerks and paper copies, with our technology only the bank sees your credit card information, which makes these transactions even safer.

All cardholder information is securely obtained and encrypted using AES 256 bit encryption, and then transmitted via a Secure Socket Layer (SSL) connection (using a Greenbar certificate) to the credit card merchant that authorizes the amount and, if approved, automatically submits for settlement with the financial institution.

We do not display the credit card # anywhere in the system. All cardholder data must be stored securely and in accordance with the Payment Card Industry (PCI) Data Security Standard, to which we adhere. After 90 days the encrypted credit card # on the cart is removed.
